
TERMS OF SERVICE

SOFTWARE LICENSE AGREEMENT

EFFECTIVE DATE: JULY 27, 2026

DOCUMENT VERSION: 1.0

By purchasing, installing, or utilizing this software, you (the "Licensee") acknowledge and agree to the following terms set forth by the Seller. Read this document in its entirety before use.

UNAUTHORIZED USE, REVERSE ENGINEERING,
OR DISTRIBUTION WILL RESULT IN
IMMEDIATE LICENSE REVOCATION

01 NATURE OF SOFTWARE

This software is a third-party overlay tool designed to provide visual assistance and enhanced functionality within supported games. It operates as an external process and interacts with game data through memory reading techniques.

The software is provided as-is for educational and entertainment purposes. The Seller makes no guarantees regarding compatibility with specific game versions, as game updates may temporarily affect functionality.

02 ACCOUNT AND KEY MANAGEMENT

Access to the software is granted through a unique license key bound to the Licensee's hardware identifier (HWID). Each key is tied to a single machine and cannot be transferred, shared, or used on multiple devices simultaneously.

The Licensee is responsible for maintaining the security of their license key. Any unauthorized use of a key, including sharing with third parties, will result in immediate revocation without notice or refund.

Keys are validated against the Seller's authentication servers. If the servers are unavailable, the software may temporarily fail to authenticate. The Seller is not responsible for downtime or connectivity issues affecting the Licensee.

03 LIMITATION OF LIABILITY

The Seller assumes absolutely no responsibility or liability for how the Licensee chooses to use this software. Any actions taken, consequences incurred, or damages resulting from the operation of this software are the sole responsibility of the Licensee.

The Seller shall not be held accountable for any account suspensions, bans, or penalties imposed by game developers or platform operators as a result of using this software. The Licensee understands and accepts all risks associated with using third-party tools.

04 PROHIBITED USE - COVERT DEPLOYMENT

The Licensee is strictly prohibited from utilizing this software in any event, interaction, or scenario where the other participating party (or parties) is unaware of its use. The Licensee must obtain explicit, informed consent from all involved parties prior to deploying the software in any shared or interactive capacity.

05 NON-DISCLOSURE OF TECHNICAL DETAILS

The Licensee is permitted to showcase or demonstrate what the software has and its active functionality. However, the Licensee is strictly prohibited from sharing, disclosing, recording, or revealing any technical details regarding how the software operates.

This includes, but is not limited to: step-by-step instructions or footage showing how to launch, execute, or trigger the software; the directory structure, file paths, or specific locations where the software or its files are stored; and any underlying code, scripts, system processes, or operational mechanisms.

06 ANTI-TAMPER & ANTI-CRACK PROTECTION

The software contains built-in integrity verification mechanisms that operate continuously in the background. Any attempt to reverse engineer, decompile, disassemble, modify, circumvent, or otherwise tamper with the software's protection systems, license validation, or binary structure will result in the immediate and automatic revocation of the Licensee's license.

Upon detection of unauthorized tampering, the following will occur simultaneously without prior notice: the Licensee's license key will be permanently blacklisted; all associated features and services will be immediately disabled; access to the software and connected services will be revoked; no refund will be issued under any circumstances; and the Licensee's hardware ID (HWID) will be flagged permanently.

Detection systems operate silently and require no manual intervention from the Seller. Revocation is automatic, irreversible, and final.

07 SERVICE AVAILABILITY AND UPDATES

The software relies on the Seller's servers for license validation and heartbeat checks. The Seller does not guarantee 100% uptime and is not responsible for temporary service interruptions caused by maintenance, server failures, or network issues.

Game updates may temporarily break software functionality. The Seller will endeavor to release compatibility patches in a timely manner but provides no guaranteed response time or turnaround for such updates.

The Seller reserves the right to modify, suspend, or discontinue any part of the software or its services at any time without prior notice.

08 LIFETIME LICENSE SCOPE

The term "Lifetime License" refers exclusively to the active commercial and developmental lifespan of the software product itself, not the natural lifespan of the Licensee. The license remains valid only for as long as the Seller

continues to support, maintain, and distribute the software.

If the Seller determines that continued development is no longer viable, the software and its services may be shut down. In such cases, all remaining licenses expire automatically and no compensation will be provided.

09 RIGHT OF TERMINATION

The Seller reserves the unconditional right to suspend, terminate, or revoke this license at any time, for any reason, with or without cause, and without prior notice. Upon termination, the Licensee must immediately cease all use of the software and permanently destroy all copies, backups, and related files in their possession.

10 NO REFUNDS

All payments are final. Under no circumstances will any refunds, reimbursements, or chargebacks be issued - including, but not limited to, instances where the license is suspended, terminated, or revoked by the Seller, if the software reaches the end of its product lifespan, or if the Licensee is unable to use the software due to game updates or compatibility issues.

The Licensee assumes full financial risk upon purchase.

11 DISCLAIMER OF WARRANTIES

This software is provided "as is" and "as available," without any representations or warranties of any kind, whether express or implied. The Seller explicitly disclaims any warranties of merchantability, fitness for a particular purpose, or non-infringement.

The Seller does not warrant that the software will be error-free, uninterrupted, or compatible with all systems and game versions.

12 INDEMNIFICATION

The Licensee agrees to indemnify, defend, and hold the Seller harmless from and against any claims, lawsuits, liabilities, damages, or expenses arising from the Licensee's breach of these terms or misuse of the software. This obligation survives the termination of this agreement indefinitely.

13 GOVERNING LAW

These terms shall be governed by and construed in accordance with applicable law. Any disputes arising under these terms shall be resolved in the Seller's sole discretion. The Licensee waives any right to class action or jury trial.

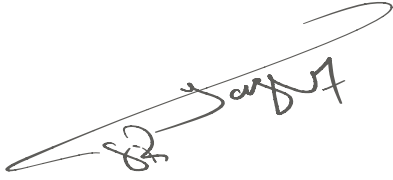

ENFORCEMENT NOTICE

Any attempt to crack, bypass, decompile, reverse engineer, or tamper with the software's protection mechanisms will result in the AUTOMATIC and IRREVERSIBLE revocation of your license. No warnings will be issued. No refunds will be granted. Detection is silent. Enforcement is permanent.

ACKNOWLEDGMENT

By purchasing, installing, or utilizing this software, the Licensee confirms that they have read, understood, and agree to be bound by all terms and conditions set forth in this document. The Licensee further acknowledges that this agreement constitutes the entire agreement between the parties and supersedes all prior agreements or understandings, whether written or oral.
